THEY ASK, WE ANSWER

Do I actually own my website?

Five things to check this week. Swipe through.

01 · THE DOMAIN

Is your web address in your business's name?

It should be registered to you, not to whoever built the site. Ask for the login.

02 · HOSTING

Can you log in to your hosting?

Know who the host is and how to get in. If it sits on someone else's account, ask how you'd move it.

03 · GOOGLE PROFILE

Are you the primary owner of your Google profile?

Google profiles have owners and managers. Be the owner. Your web person only needs to be a manager.

04 · EMAIL

Who controls your business email?

If your email uses your web address, whoever controls the domain can control your email too.

05 · THE LOGINS

Get every login in writing.

Before you pay the final invoice. Keep them somewhere you control, not in someone else's inbox.

WITH US

Your domain, website and Google profile are yours.
